

**23rd - 27th
OCTOBER
CONSERVATION
WEEK**

**Less than 8000 wild Barbary macaques
still surviving in North Africa**

**More than a thousand species in danger
of extinction in Madagascar**

Let's act together to conserve biodiversity!

**La Montagne des Singes collects 1 € from your entrance ticket
and allocates it to two conservation projects.**

YOUR CHOICE!

Action n°1

Action for education in Moroccan schools

Degradation of natural habitat and illegal trade have led to a drastic decline of wild Barbary macaques' populations.

Aims:

- Providing school children with knowledge about the species
- Explaining how to protect the Barbary macaque and its natural habitat

In Moroccan schools
From 2019 onwards
BMAC

(Barbary Macaque Awareness & Conservation)

← **WHERE?** →

← **WHEN?** →

The Kirindy forest, west of Madagascar
From 2021 onwards
Chances for Nature

Action n°2

Protection of biodiversity in Madagascar

Madagascar is home to unique species such as lemurs, which are currently under severe threat. Their habitat is extremely degraded.

Aims:

- Strengthening protection and monitoring activities of the forest
- Developing environmental education

At the exit of the park, put **the token**, given at the entrance, in the box of your choice. Thank you!
